# Connect a physical keyboard to your tablet/smartphone (Bluetooth® connection)

- Power the device by sliding the power button in the ON position, the LED indicator flashes blue, indicating it is in pairing mode.
- Keep the device and your Bluetooth®-enabled appliance within 1 metre (3 ft) of each other during the pairing process.
- Make your mobile phone, laptop or computer search for compatible Bluetooth<sup>®</sup> devices. (Make sure the Bluetooth<sup>®</sup> function is turned ON).
- When your mobile phone, laptop or computer finds the device, select "LAB31 Keyboard" from the list of found devices.
- The LED indicator will no longer light up, indicating successful pairing. The device is now ready for use.
- If a paired Bluetooth®-enabled appliance is in range, the device will connect automatically.

# Change your physical keyboard's settings

### 2. Tap System ► General management ► Keyboard ► Physical keyboard.

### 3. Under "Physical keyboard", change the physical keyboard layout:

- Choose your current physical keyboard
- Choose the language for which you want to change the layout
- Choose a layout (for example: for AZERTY use Belgian or French, for QWERTZ use German)

4. To keep your virtual keyboard, under "Options", change the setting:

• Use on-screen keyboard: Turn this on if you want to keep your virtual keyboard on the tablet/smartphone's screen when the physical keyboard is active.

**Tip:** The language settings for your on-screen keyboard are automatically applied to your physical keyboard after you connect it to your tablet/smartphone.

### Connect a physical keyboard to your tablet/smartphone (Bluetooth® connection)

- Power the device by sliding the power button in the ON position, the LED indicator flashes blue, indicating it is in pairing mode.
- Keep the device and your Bluetooth®-enabled appliance within 1 metre (3 ft) of each other during the pairing process.
- Make your mobile phone, laptop or computer search for compatible Bluetooth<sup>®</sup> devices. (Make sure the Bluetooth<sup>®</sup> function is turned ON).
- When your mobile phone, laptop or computer finds the device, select "LAB31 Keyboard" from the list of found devices.
- The LED indicator will no longer light up, indicating successful pairing. The device is now ready for use.
- If a paired Bluetooth®-enabled appliance is in range, the device will connect automatically.

### Control iPhone/tablet with an external keyboard

If you use a physical keyboard with iPhone/tablet, you can use Full Keyboard Access to control your device.

You can use an alternative keyboard layout that doesn't match the keys on your keyboard.
